35 & 50 mm slats.

25 MM

**VALANCE**

Use a wood valance to cover up the steel headrail

**50 MM**

# SPECIAL SYSTEMS

## LITERISE®

- Lifting, lowering and tilting by just moving the bottom rail.
- No control cords for a clean, uncluttered look.
- Child safe solution.
- Suitable for smaller windows within hand reach.

## TOP DOWN BOTTOM UP

- Lifting and lowering only by pulling or pushing the head and bottom rail.
- Tilt the blind by using the special knob on the head rail.
- No control cords for a clean, uncluttered look.
- Child safe solution.
- Suitable for smaller windows within hand reach.

## MEGAVIEW®

- 25 mm slats with 50 mm view.
- Closed the blind looks like a normal 25 mm slats blind, but opened it looks like a 50 mm slats blind.

## TRUFIT®

- Installation without drilling or screwing.
- Always in combination with the top down bottom up system.
- Child safe solution.
- Perfect for turn- and tilt windows within hand reach.

**LITERISE®**

Lifting, lowering and tilting  
by just moving the handle  
on the bottom rail.

**MEGAVIEW®**

The look of 25 mm slats  
with the view of 50 mm slats.

## STRING OR TAPE

**LADDERSTRING**

Standard

**LADDERTAPE**

Only for 35 & 50 mm slats

## TOP DOWN BOTTOM UP

The blinds can be operated easily by pulling or pushing the handle on the head and bottom rail. You can tilt the slats by using the knob on the head rail.

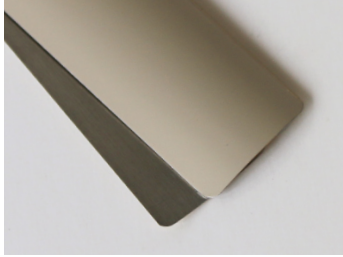

# SPECIAL SLATS

**INFRA-RED®**

- Solar heat reflection\* ↑
- Glare ↓

**THERMOSTOP™**

- Thermal insulation ↑
- Solar heat gain ↓

**WHITE BACK SIDE**

- Solar heat reflection ↑
- Glare ↓

\* Important for dark colours

## USE OF COLOUR

Dark coloured slats provide a better glare control but less solar heat reflection.

If you want less solar heat gain, you better choose a lighter colour.

**TRUFIT®**

With a Trufit® blind you can install venetian blinds without drilling or screwing. This type is perfect for tilt-& turn windows.
